

Indochine hebdomadaire illustre & Thiên-dạo chơn-truyện

Description and Rationale

Bob Jones Indochina Serials

I am requesting funds to digitize two rare serial titles from the Bob Jones Indochina Collection. These materials, collected by Jones while stationed in Saigon during the War, are mostly brittle or in poor condition. This request includes news and serials 1940s and 1950s.

Project Description

The project continues the work of my proposal from last year to digitize important materials from the Bob Jones collection on Indochina. These materials include some of the larger runs of serials as well as a selection of short runs of Saigon newspapers from the 1960s.

Reasons for Consideration

The titles included here are not available elsewhere in the US. Both are consistent with the types of materials being digitized from the Bob Jones collection as a result of a proposal from UW last year.
